

# ASBESTOS DISPOSAL

## GUIDELINES FOR DELIVERY TO

EAST PRINCE WASTE MANAGEMENT FACILITY (EPWMF)

29786 HIGHWAY 2, WELLINGTON CENTER PE

## ASBESTOS IS ACCEPTED AT EPWMF

**MONDAY THRU FRIDAY ONLY 9:00 AM TO 3:30 PM**

Asbestos being delivered to EPWMF for disposal require a permit from

PEI Department of Communities, Land and Environment (DCL&E)

### **ALL ASBESTOS MUST BE:**

DOUBLE-WRAPPED OR DOUBLE-BAGGED AND TAPED SO THAT THE ASBESTOS WILL NOT TEAR THE BAG AS IT'S BEING OFF-LOADED.

Examples of "double-wrapped" or "double-bagged" are:

- Asbestos placed inside a plastic bag and sealed and then placed in another plastic bag which is sealed and taped so the asbestos will not escape when being off-loaded. This is best done in small amounts as heavier bags tend to break open when being off-loaded.
- Asbestos placed in a bag and sealed and then placed in a cardboard box or plastic drum that is then taped shut.
- Asbestos placed in a cardboard box and then in a plastic bag that is sealed shut.
- Asbestos double-wrapped inside tear resistant plastic sheets and taped shut so the package will not open when off-loading. Remembering that too large a bundle will break apart when off-loading.

### **24 HOURS NOTICE**

EPWMF requires 24 hour notice before accepting asbestos for disposal. Faxing the permit is not considered giving notice. It is always required that you phone the facility 24 hours prior to the requested delivery time to make an appointment to deliver asbestos (do not leave a message to confirm delivery time). The hauler and / or generator are responsible to confirm that the facility received notification of asbestos delivery.
